PROFILE

Software engineer and technical leader with 30+ years of hands-on experience architecting, scaling, and modernizing cloud-native, multi-tenant SaaS platforms. Founder of an independent holding company and creator of Habit Networks, a managed website platform powered by an in-browser AI agent. Senior-most technical authority for a market-leading e-learning ecosystem. Deep, current expertise in Cloudflare's edge platform (Workers, D1, R2, Durable Objects), API-first architecture, DevOps, and the data, identity, and control-plane foundations required for safe, autonomous systems.

TECHNICAL SKILLS

- **Languages:** JavaScript/TypeScript, Python, PHP, Java, C#, HTML, CSS, Bash
- **Edge & Serverless:** Cloudflare Workers, D1, R2, Durable Objects, KV, Pages, Cloudflare WAF
- **Frameworks & Runtimes:** Node.js, React, jQuery
- **AI / Agentic:** Agentic system design, LLM orchestration, MCP (Model Context Protocol) servers, OpenAI API, OpenRouter, KlingAI, AI-assisted development
- **Databases:** D1, MySQL, Postgres, Redis
- **Cloud Platforms:** Cloudflare, AWS (incl. SES), Google Cloud, Heroku
- **DevOps & CI/CD:** GitHub Actions, GitLab CI, Terraform, Git, GitHub App integrations
- **Methodologies:** Agile, Scrum, continuous integration/deployment, API-first design

CORE STRENGTHS

- Platform and distributed-systems architecture
- Cloudflare-native, edge-first infrastructure
- AI-assisted and agent-ready platform design
- Identity, authentication, and secure content delivery
- DNS, PKI, and certificate-aware systems
- End-to-end ownership across DevOps, engineering, and delivery

PROFESSIONAL EXPERIENCE

Founder & Principal Engineer

Forest of Knowledge Inc. · Habit Networks · Habit Earth LLC — Denver, CO (*current*)

- Founded Forest of Knowledge Inc., a holding company for a portfolio of software and product ventures.
- Created **Habit Networks** (habitnetworks.com), a managed website platform that pairs design, build, and ongoing support with an in-browser **AI agent**: clients point out problems or describe ideas while browsing, and the agent captures screenshots, conversations, and change requests, drafts AI-assisted changes, and previews them for review before publishing.
- Architected the platform end-to-end on **Cloudflare** (Workers, D1, R2, Durable Objects) with **GitHub App** integration linking client repositories to the agent, administered through a custom "Habit Admin" control-plane panel.
- Designed and operate a **49-domain Cloudflare portfolio** with automated DNS, parking, and redirect management.
- Ship and host a growing network of live sites spanning CME education, e-commerce, local directories, 3D home exploration, and audio apps (see Network Sites below).

Chief Technology Officer

PRESENT e-Learning Systems — Boca Raton, FL (*2015 – present*)

- Sole technical authority for the #1 provider of online continuing education in podiatry (podiatry.com).
- Led a six-person publishing and development team; maintained and hosted 20+ websites across production, staging, and development environments.
- Reduced annual operational costs by at least \$80,000 within the first year as CTO while maintaining 99.9% uptime.
- Migrated and hardened edge infrastructure on **Cloudflare** (Workers, WAF rules, secure content delivery) alongside AWS hosting.

- Engineered full-stack, API-first solutions, including complex API development, integrations, and migrations.
- Served as primary contact for clients licensing the Learning Management platform.
- Streamlined operations with Agile and DevOps practices, improving delivery timelines and system reliability.

Senior Programmer

PRESENT e-Learning Systems — Boca Raton, FL (2010 – 2015)

- Lead developer responsible for software development initiatives.
- Developed comprehensive APIs and full-stack solutions.
- Improved system efficiency, scalability, and reliability.

Junior Programmer

PRESENT e-Learning Systems — Boca Raton, FL (2006 – 2010)

- Collaborated closely with development teams on the Mentor LMS project.
- Gained extensive experience in API and full-stack development.

SELECTED PROJECTS

Habit Networks — Managed Website Platform + In-Browser AI Agent (Cloudflare)

- Cloudflare-native platform combining website design/build, ongoing support, and an AI change-request agent that walks clients through their live pages, follows along in real time, and turns conversations and screenshots into previewed, publish-ready changes.
- Control-plane Worker plus GitHub App links client repositories to the agent; managed through a custom Habit Admin panel with content, inquiry, event, and customer-information tools.

NeuroGardens — AI Video & Vibroacoustic Platform

- AI-driven video tool orchestrating KlingAI and OpenRouter to generate sequential clips with visual continuity, part of a broader sound-healing / vibroacoustic practitioner platform.

Podiatry Multimedia AI Agent

- Imported an extensive multimedia library into an AI-driven platform that lets customers interactively query and engage with podiatry educational content, using conversational AI and NLP for precise, relevant responses.

Content Creation Automation Tool (AWS, OpenAI API)

- Multimedia automation tool combining AWS infrastructure, the OpenAI API, and FFmpeg to automate complex content workflows; prototyped and deployed within 24 hours.

SMS AI Agent Device (Minimal Phone MP01)

- Prototyped a purpose-built messaging device with a custom e-ink-optimized app, backed by a self-hosted SMS gateway and MCP server.

NETWORK SITES (HABIT NETWORKS)

- **PRESENT Podiatry** — news, CME lectures, and conferences for the podiatry field.
- **Habit Earth Homes** — 3D interactive exploration for natural / earthen home building.
- **Adobe Ninja** — earth-building tool showcase.
- **Habit.Earth** — local business discovery directory.
- **FamilyApp / "Family Hub"** — family-coordination app on Cloudflare Workers with AWS SES email.
- **Sweepless in Seattle** — civic-focused Cloudflare Worker with a Git-based CI workflow.

EDUCATION

- Self-directed: extensive hands-on experience in software development, cloud technologies, and DevOps methodologies since 1994.

PERSONAL INTERESTS

- Continuous learning, travel, meditation, and yoga — experiences that sharpen adaptability, problem-solving, and innovative thinking.
